Application No.: 10/623,773 Examiner: Raleigh W. Chiu

Art Unit: 3711

LIST OF CURRENT CLAIMS

1. (Cancelled)

2. (Currently Amended) the The racket as defined in claim [[1]] 14, wherein the

elastic member is made into formed as a tube.

3. (Currently Amended) The racket as defined in claim [[1]],14 wherein the

elastic member is made into a piece.

4. (Cancelled)

5. (Currently Amended) The racket as defined in claim [[1]] 14, wherein the

cover layer has an interlayer between the elastic member and the frame.

6. (Currently Amended) The racket as defined in claim [[1]] 14, wherein the

connection portion has two arms and a shaft, wherein the arms respectively have one

end coupled with the rim, and the other ends of the arms are merged together and

coupled with an end of the shaft, and the other end of the shaft is coupled with the

handle.

7. (Currently Amended) The racket as defined in claim [[1]] 14, wherein the

elastic member is mounted on the rim.

8. (Original) The racket as defined in claim 6, wherein the elastic member is

mounted on the rim and located between the arms.

3

Application No.: 10/623,773

Examiner: Raleigh W. Chiu

Art Unit: 3711

9. (Previously Amended) The racket as defined in claim 6, wherein the elastic

member is mounted on one of the arms.

10. (Original) The racket as defined in claim 6, wherein the elastic member is

mounted on the shaft.

11 - 13. (Canceled)

14. (Previously Presented) A racket, comprising:

a frame having a rim and a connection portion at an end of the rim;

a handle fixed at a distal end of the connection portion;

an elastic member attached on a predetermined portion of the frame;

a cover layer wrapped around the frame and the elastic member; and

a pad arranged between the elastic member and the cover layer;

wherein the vibration wave transmission velocities of the pad, the frame, the

elastic member and the cover layer are different from one another.
